PURPOSE

As Dilovas Technology, we add value to the sector by integrating laser docking, sensor integration, and “open-link” software developed for port and jetty operations, and we commit to conducting all our activities in full compliance with the **ISO 9001:2015 Quality Management System** and **ISO 14001:2015 Environmental Management System** standards.

In this regard, our Integrated Policy is based on the following fundamental principles:

1. ISO 9001-FOCUSED QUALITY AND CUSTOMER SATISFACTION

Understanding our customers' real needs, providing high-tech engineering solutions that exceed their expectations, and delivering long-term benefits to them are our top priorities. In line with ISO 9001 principles, we aim to be a technological leader in the industry by basing our decisions on evidence-based data and analysis rather than intuition.

2. ISO 14001-FOCUSED ENVIRONMENTAL RESPONSIBILITY

We control our environmental impact in accordance with ISO 14001 requirements at every stage of our design, production, field installation, and maintenance processes.

- **Nature Conservation:**
In conducting our activities, we commit to not only preventing pollution but also protecting ecosystems, biodiversity, and the atmosphere, working in harmony with nature by eliminating the negative environmental impacts of our operations at source.
- **Waste Management:**
We separate electronic waste, batteries, and assembly waste in accordance with legal regulations and ensure they are disposed of by licensed companies.
- **Energy Efficiency:**
We aim to increase energy efficiency in our product designs and office/field operations.

3. LEGAL AND ETHICAL COMPLIANCE

We guarantee full compliance with national and international environmental regulations, occupational health and safety standards, and customer requirements in all areas of our operations.

4. PROCESS APPROACH AND CONTINUOUS IMPROVEMENT

We view success not as a destination, but as a continuous journey. We manage our processes using the ‘Plan-Do-Check-Act (PDCA)’ cycle; we aim to make our system better every day than the day before by identifying risks and opportunities in advance.

5. EMPLOYEE INVOLVEMENT AND STRONG BUSINESS PARTNERSHIPS

Our greatest strength is our employees. We organise training to enhance their competence and provide opportunities for them to bring their ideas to life. We also raise awareness among our suppliers and business partners about our ISO 9001:2015 and ISO 14001:2015 standards, creating a chain of success and sustainability.

Dilovas Technology hereby commits to all its stakeholders that it will fulfil its responsibility to create an environmentally conscious and sustainable future without compromising quality standards.
